Latte - Cappuccino - Short - Cocktail

Doppio. was created from observations of how people use and misuse everyday objects.

People more often than not disregard the handle of a cup in favour of gripping their hands around the surface of the cup.

This cup is double walled which allows for the loss of a handle. The cup can be used for both hot and cold liquids alike due to the nature of Borosilicate glass which the cup would be made from in production.

Doppio can be reversed either way to reveal it's self as a Espresso/Shot glass or a Cappuccino/Short glass.
